

Appeon® 6.0

for PowerBuilder®

Appeon 6.0 for PowerBuilder is the most powerful and flexible version to date. Now it enables you to develop and deploy extremely complicated PowerBuilder applications to both Java and .NET platforms. There is no easier or faster approach to develop robust user-friendly business applications.

Build .NET-based Web Applications

Aligned with PowerBuilder's .NET support, you can now...

- ▶ Build new .NET-based Web applications with the most robust PowerBuilder features support on the Web
- ▶ Rapidly convert your existing PB applications (up to 500 MBs) to the Web and .NET platform
- ▶ Maintain one set of code for three deployment models - WinForm, WebForm, and Java Web, with no extra effort

Deploy Java-based Web Applications to Linux

Appeon now supports deploying to Red Hat Enterprise Linux. Your organization can take advantage of all the benefits that the Linux open-source operating system has to offer, including improved security, reliability, scalability, as well as lower cost of ownership.

Enhanced PowerBuilder Support

- ▶ **PowerBuilder 11.1 and PB.NET Support**
Also backwards compatible with PowerBuilder 9, 10 and 10.5.
- ▶ **Extensive DataWindow Presentation Style Support**
All DataWindow presentation styles (except OLE) are now supported, enabling developers to create sophisticated reports and display formats. TreeView DataWindow is new to this version.
- ▶ **Updated PowerBuilder Foundation Classes (PFC) Support**
The PFC version compatible with PowerBuilder 11 is now supported. Simply modify several lines of PowerScript and enjoy robust PFC support.
- ▶ **Extensive UI Control Support**
All UI controls are now supported, enabling developers to create rich and user-friendly GUIs for their Web applications. MonthCalendar and DatePicker are new to this version.

Faster Runtime Performance on .NET

Applications deployed to .NET with Appeon will benefit from improved runtime performance by as much as 20%. Appeon uniquely delivers the performance of Client/Server and the scalability of the Web, keeping your users happy and productive.

Enhanced Productivity for Developers

- ▶ **Deploy to Java & .NET With a Single Application Profile**
Appeon Developer allows you to deploy your PB application to both .NET and Java platforms using the same set of PBLs and the same Appeon Web application profile.
- ▶ **Prioritize Unsupported Features Based on Importance**
Any unsupported features found (if any) are automatically prioritized by Appeon based on the importance of modifying them. As such, you can focus your energy on the most important unsupported features first to produce more meaningful results even faster.

Enhanced Platform Support

- ▶ **Operating Systems** - Windows Vista/XP (64-bit or 32-bit), Windows Server 2008/2003 (64-bit or 32-bit), Red Hat Enterprise Linux 5.0/4.0, and IBM AIX 5.3/5.2 are supported in Appeon 6.0.
- ▶ **Java and .NET Application Servers** - Microsoft IIS 7.0/6.0 (with .NET Framework 3.0/2.0), Sybase EAServer 6.1/5.5, BEA WebLogic 10.0/9.2, and IBM WebSphere 6.1/5.1 are supported in Appeon 6.0.
- ▶ **Databases** - Sybase ASA 10.0/9.0/8.0, Sybase ASE 15.0/12.5, Sybase IQ 12.7, Microsoft SQL Server 2005/2000, Oracle 10g/9i/8i, IBM DB2 9.5/8.2, and Informix 9/7 are supported in Appeon 6.0.
